NEWS AND GOSSIP.

AND From recent estimates it is ascertained that there are nearly 1,200 iron works in the Union; that these produce annually about 850,000 tuns of iron, the value of which, in an ordinary year, is fifty millions of dollars. Of this amount the portion expended for labor alone is \$360,000. The amount of rolled

ron made in the United States is about 500,-000 tuns per annum. Of this, about 300,000 tuns are made east and 200,000 tuns west of the Allegheny mountains. Miss H. K. Clapp, formerly of Lansing, Mich., well known as a teacher, has been among the Mormons, and has written

home her experience of the Saints and her observations upon their institutions. Her letter is published in a Lansing paper, and is very highly seasoned. She lashes Brigham Young and his system, and exposes the frauds perpetrated by the Government agents in Utah.

There are in Massachuseets five Unitarian clergymen who have been settled over their charges for upward of half a century, viz: Rev. Joseph Richardson, of Hingham, settled in 1806; Charles Lowell, D. D., of Boston, settled in 1807; Rev. Abraham Gushee, of Dighton, settled in 1807; Charles Wellington, D. D., of Templeton, settled in 1807; Samuel Willard, D. D., of Deerfield, who is eighty-four years of

The Rev. Thomas Dewitt, D. D., of New York, has been spending two months at the Holland Colony, a settlement of native Hollanders, at Holland, Ottawa County, Michigan, founded under the auspices of the General Synod of the Dutch Church. The churches in the Holland Colony have received very liberal aid from the Collegiate Church in New York

The Boston Traveller says of the suspension of the publishing house of Phillips, Sampson & Co.: "The Courier, in noticing this suspension, states that the "Atlantic Monthly load" was one of the causes of their embarrassment. So far from this being true, we are assured, on reliable authority, that the Atlantic has not only paid its expenses, but a very handsome profit over its cost."

Thomas G. Kearney, a police officer in New Orleans, died last week from an injury received while diving. He dived into the water only about five feet deep, and from an elevation of some ten feet above the surface of the water. He was seen to go perpendicularly down, with his feet straight up in the air, and came up perfectly senseless and paralyzed.

35 Second Lieutenant Charles J. Lynde, of the fifth regiment of infantry, was recently tried by court-mertial in Utah for insulting and striking Lieutenant Wharton, and for diso-bedience of orders. He was found guilty and entenced to be dismissed from the army. The President has approved the sentence.

Mr. Gerrit Smith, the Peterboro' philanthropist, pays for all the articles, letters and sermons which he causes to be printed in the papers. With him it is a direct matter of busi-It would be well if many others who ask the "favor of space" copied his example. There was lately on exhibition at Sid-

ney, Australia, a set of horse-shoes made of native gold, weighing twenty-four ounces, and worth about five hundred dollars. They were made for a pony in New South Wales.

25 It is authoritatively stated that the amount of money remitted home by Irishmen resident in America, the last year, for the purpose of assisting their friends to emigrate, was \$2,360,000. The ten preceding years the amount remitted was \$49,680,000.

The Scandinavians in Chicago pro pose to establish two Norse newspapers in that city — one to be printed in the Swedish language and the other in Norwegian. One association of proprietors is to control both establishments.

A new steam fire engine was exhibited at Boston on Monday. It weighs only two thousand four hundred pounds, and can be drawn by one horse. The machine will force an inch and a quarter stream two hundred

feet horizontally. The tax levy of New York for the next fiscal year is \$0,860,000, a tolerably large sum for bad municipal government. The rate is \$1 79 21-100 on the \$100, the valuation of property being \$551,923,100.

Ten Broeck writes from England to a friend in Memphis that his winnings in Eng-land this year topped \$440,000! to gain which he risked but \$20,000. Think of that,

hewers of wood and drawers of water. Very pretty Geneva watches are sold in Paris this season in the form of a heart, in that of a tulip, or representing a shell, on which are admirably painted views of Ge-

neva, or pastoral scenes. The annual income of Mr. William McDonald, the owner of Flora Temple, is said to be \$80,000. He resides in Baltimore.

Tames R. McDowell, a prominent citi-sen of Vicksburg, Miss., died at the Virginia White Sulphur Springs on the 25th ult.

The losses by the great fire at Halifax on Friday night will amount in the aggregate to about a million of dollars.

IMPROVEMENTS AT MOUNT VERNON,-We learn from the Mount Vernon Record that the work of putting Mount Vernon in good con-dition has been fairly begun. Since the first of July workmen, under the superintendence of a competent gentleman, have been busily engaged in repairing out-houses, tracing and cleaning up the old and almost forgotten paths, and fortifying in some measure the sacred spot against the ravages of decay. The Record also states that \$15,000 of the fourth and last installment for the purchase of Mount Vernen has already been paid to Mr. Washington, leaving only about \$30,000 to be paid to com-

CARDS .- Playing cards are said to have been invented a out the close of the fourteenth centary by a Parisian painter for the amusement of the French King, Charles VI, in his lucid of the Fronce King, Charles VI, in his lucid intervals. They were very different in appearance and price then from what they now are. They were glided, and the figures painted or illuminated. The inventor, Gringoneur, sold them at eighteen shillings and eight pence per sock.

Vigilance Committee in Vicksburg. The Nashville Patriot contains the following

Vicksburg, Miss., must be a desperate place. A letter from that place, received yesterday by a gentleman of this city, says: "Last Tuesday morning J. T. Head, without any provocation whatever, shot and mortally wounded a young man by the name of Wells, a printer by trade. Wells is still alive, but his physicians say he wanted traces." cannot recover. Head was to have been tried before the Committing Court yesterday, but the ease was continued, to see whether or not the boy dies. He is about eighteen years of age. I do not think the court will ever be troubled with this case; for there were seventy citizens present, who were pledged to each other to take Head into custody as soon as he was brought outside of the prison walls, and to hang him without further ceremony. Their rope was prepared and the limb on which he was to hang selected. They still intend to hang him. This is the fourth murder Head has committed.

"This is not all: when a citizen retires at night, he places his gun, repeater or knife about him, to protect himself and family from the assassinations of robbers, burglars, &c., who are overrunning the city. There have been twenty-five or thirty houses broken open and robbed within the last few weeks. place seems to be filled with desperate villains. A 'Vigilance Committee' has been formedtheir patrols appointed, who are constantly on The committee gave notice in the morning's Sun, for all persons who could not give a good account of themselves to leave the place, within three days, or abide the consequences. Whoever walks the streets at night is saluted with the word 'halt,' on every corner, and if the command is not obeyed, it is enforced by the presentation of a double-barrel gun or a Colt's repeater. I hope the desired result may be effected."

A Tale of Blood-A Woman Murders her Husband and Son and Commits

Suicide. A fearful tragedy occurred last Sunday at a lonely farm-house about three miles from Ver-scilles, Ripley County, Indiana. The premises were occupied by a farmer named John Windsor, his wife and a son, the latter aged fourteen years. It seems that the man and woman lived unhappily together, and their frequent riolent altercations were a subject of comment to the nei theorhood. Upon the afternoon of Sunday their daughter, who had been upon a visit to a neighboring acquaintance, with whom she remained several days, returned home, and entering the house, was paralyzed by a sight of such intense horror as almost to deprive her of reason. Extended upon the floor, weltering in their blood, lay the bodies of her parents and her brother. The man was lying upon his face near the hearth, with his head nearly severed from the shoulders; the body of the boy lay in another part of the room, with several murderous cuts in his head, and close by the bloody weapon, a sharp ax, with which this double leed of horror had been consummated. In the kitchen adjoining was the body of the wretched woman, her throat severed from ear to ear, and a large butcher-knife, with which she had taken her life, still clasped in her hand.

It is conjectured that while the husband was in the act of kindling a fire upon the hearth, his wife seized the ax and dealt him the fatal blow, which nearly severed the head from the body, and then turning upon her sen, who, from being in his night clothes, had evidently in alarm just arisen from his bed, she dispatched him with the same weapon, after which she rushed into the next spartment and concluded the tragedy by the sacrifice of her own life.

The poor girl, who is the sole survivor of the ll-fated family, has received so severe a shock revealed to her, that she has ever since been bordering upon insanity.

Can Iron and Steel Plates Resist Shot?

A series of experimental trials have been carried on during the past fortnight at Portsmouth, with a view of ascertaining the amount of resistance offered by Iron and steel plates of various manufactures when opposed to heavy ordnance at a short range. The trials are understood to have reference to the future coating of the steam ram now in progress of construction. The practice been carried on from the Stork gunboat tender to Her Majesty's ship Excellent, gunnery ship in Portsmouth harbor, both from a 32-pounder and a 95-cwt. gun, the latter throwing a solid 68-pound shot, with 16-pound charge of powder; the distance of range 200 yards. At this distance the results of the experiments have demonstrated in the clearest possible manner that no iron or steel plate that has yet been manufactured can withstand the solid shot from the 95-cwt. gun at a short range. The first shot would not penetrate through the iron plate, but it would fracture it, and on three or four striking the plate in the same place, or in the immediate neighborhood, it would be smashed to pieces.

As the results of the trial affected the steel plates, it proved that a steel-clothed ship could be far more easily destroyed than a wooden-sided one, and that on the smashing in of one of the steel plates the destruction of life on the armed ship's decks, supposing the broken plate to be driven through the ship's side, would be something dreadful to contemplate, from the splintered material.
At from 600 to 800 yards iron-clothed ships
would be in comparative safety from the effects of an enemy's broadside, but it must be borne in mind that the effects of concentrated firing have yet to be ascertained on the sides of an iron or steel clothed ship; an account also must be taken of the damage the wood-work forming the inner side of such a ship

back.—Liverpool Post. The Balloon Ascension at Paris. Ky. According to the description given to us, the balloon ascension at Paris, Kentucky, on Saturday night, was unique and of thrilling in-terest. Professor Wilson secured eight hundred yards of ten-cent cotton, made a balloon, and there not being gas in the blue-grass re gion, a pit was dug, a sheet-iron trench in-serted, wood fired therein, the balloon suspended over it by cord from the bridge on one side and pole on the other, the balloon was inflated by "calorie"—PENNY PRESS power and when all parts were rounded out hand-somely, the Professor cut loose, he hanging to the basket awang underneath—the bridge was cleared, and amid Kentucky shouts, balloon went up, and landed some two miles from place of starting, breaking a limb of a tree in landing. The Professor landed safely and was coolly rolling up the ten-cent cotton when the farmer near came to his assistance and brought him to town, where he was toasted and his purse well filled.

AN OLD LADY .- A friend informs the editor of the Fayetteville Observer that Mrs. Martha Reynolds, now living near Tullahma, Coffee County, Tennessee, is one hundred and-eighteen years of ago. Her son, Jacob Rey-nolds, who died about two years ago, was a government pensioner, having been wounded in the Revolutionary War. The old lady is still enjoying good health.

Zer General Wm. Walker arrived at New Orleans on the 5th inst.

contract of demonstrate ne

A FAMIN NONGTHE BEARS .- The fact that an unusually "rge number of bears have made their appearance in many sections of Virginia and Pennsylvania this season has heretofore been referred to. The Rockingham (Va.) Register says:

There is said to be little or no must in the mountains this season. The consequence is that bears are becoming exceedingly troublesome in the settlements. They have come down from their retreats in the mountains, and are playing sad havor with corn-fields, cattle and sheep. Mr. Senger, living near Mole Hill, in this county, had several cattle killed by the animals, near the Richlands, a few days ago. Mr. John Miller, living near Hoo-ver's Mill, on the South Fork, in Pendleton County, also had a number of sheep—about half his flock—killed in the same way, a short time since. They are also destroying the corn-fields within their range. The fields of Messrs. David Gladwell and Peachy Gordon, three or four miles from Rawley Springs, show marks of the teeth of the half-starved bears coming down into the settlements.

THE AURORA BOREALIS AS SEEN ON THE OCEAN .- Captain Urann, of the bark Pride of the Sea, which left Zaza, Cuba, on the 23d of August, and arrived at New York on Saturday, furnishes the following description of the Northern Light of Friday, September 2, as witnessed by him on the Atlantic, in latitude 28:30 North, and longitude 79:30 East:

At twenty-five minutes to one in the morning a bright spot or cloud appeared in the north-west, which shot up rays resembling the Aurora at the north in winter, and in thirty or forty minutes formed an arch across the horizon, from north-west to north-east, which became lighter as it arose, and at one o'clock and fifteen minutes it was light enough to read the smallest print without a light. At the time the horizon was cloudy, and overhead was very clear, the larger stars being just seen. The passed over to the southward at two o'clock and afteen minutes, when it became dark again.

Bill Lloyd, the notorious libertine, who ran away with Mrs. Shaw, of Louisville, is now in jail at Chicago, Illinois. After enjoying the honeymoon he left her, saying that she was a rather expensive piece of crinoline to suit the state of his exchequer. The Louisville Democrat says:

"He took with him, our informant states, a diamond breastpin, belonging to Mrs. Shaw, a gift from her husband. Incensed at this, she pursued him to Chicago, and had him arrested. He is now in jail awaiting the appearance of the husband to prosecute the case. While it is very proper that Lloyd and Mrs. Shaw should pay the penalty of the law, it is to be hoped that the husband will give himself no further condern about them, than to see that justice be done, and that is what the fugitives

A NOBLE MOTHER-NABROW ESCAPE.-As the morning train from this place to Chicago came near Rock River bridge, on Monday last, came near Rock River bridge, on Rionday last, the engineer, Robert Waugh, discovered a little girl at play on the track. He sounded the whistle at its highest, charpest note, and used every possible effort to stop the train. The little child kept moving along the track, apparently frightened by the whistle, but did not leave the track. The mother of the child, who lived in a house near the bridge, seeing her who lived in a house near the bridge, seeing her child in danger, made a spring to save her, and rushing in front of the engine, caught her from the horrid scene which was so unexpectedly child and fell over the opposite side. The engine brushed her clothes as she fell, and passed on a short distance before it could be stopped. The conductor, Captain Phillips, ran to place and found the mother had fainted, but both mother and child were saved. He took the child in his arms, and restoratives being used, the mother soon revived. Who can tell the joy of that mother to know her child was saved? Had she hesitated a moment, or have been only a second later, both mother and child must have been crushed beneath the wheels of the engine. We did not learn her name, but whoever she is, she is a brave and heroic wo-man.—Rock Island (Ill.) Argur.

Kansas.-A letter in an Eastern paper says: "The future of Kansas is still bright. It will be a large State—one-third larger than all New England, as large as Maryland and Virginia, larger than Pennsylvania and Indiana together, nearly one-third larger than Missouri, Illinois, Kentucky, Iowa, Michigan, Wisconsin, or New York. It is the garden of the Republic, and bears a long and intimate acquaintance remarkably well. Farmers of New England! come out to Kansas and look for yourselves. There is still room for those who wish to help us build up a new State. It is an agricultural country that we expect to rival, if not excel, all the States. We have given up the mining region to the Jeffersonians, who have already inaugurated a government of their own, and do not wish to have any partor lot with Eastern Kansas. With one-half the labor required to work a farm in New Hampshire, a man can live on one hundred and sixty acres in Kansas, and feel as rich as a king. It is the last of the good lands of the West, so men say that have traveled over Oregon, Washington and the plains further south."

ANOTHER LADY TEACHER SWINDLED .- A man calling himself Bruce, but whose real name is McAlpine, was committed to the Tombs in New work forming the inner side of such a ship would receive from the driving in of the broken plates, and which, as far as the pres- and the girl who answered it lost her baggage, ent experiments have illustrated, would appear to prove that an iron or steel-clad ship, on receiving a concentrated broadside from a frigate, armed in a similar manner to the Mersey, and struck near her water-line, must sink then and there with her armor on her authorized to contract for \$250,000 worth of rifles, &c. He once attempted to swindle the Vanderbilt Steamship Company out of \$3,000 by compelling, by threats and promises, a woman to swear to the loss of baggage on the passage from California. He deserted his wife and family three or four year since.

Parisian.—The Pacis Moniteur des Arts says: "A remantie marriage has just taken place. At the Theater du Palais Royal, about a year ago, was a young actress, only seven-teen years of age, and remarkably handsome; but in spite of her youth and beauty, her suc-cess was not great. A wealthy Moldavian, who had shortly before lost his wife, and who had come to Paris to dissipate his sorrow, saw her, and was exceedingly struck to find that she exactly resembled the departed. He returned several times to the theater, and became fascinated with her. At length he sought out her parents, requested permission to be-come a suitor for her hand, and was accepted; and a few days back, by lawful marriage, he gave her his name and fortune, the latter consisting of sixty thousand francs a year. The Moldavian is named Sterian—the young lady is daughter of M. Panier, responsible editor of the Charivari.'

The Hendricks County, Ind., people are going to have a new feature in their fair this fail. Some citizens of the northern part of that county are going to exhibit a fast trotting bull in harness, and challenge competition, offering a premium of twenty-five dollars to the winner. This is not a part of the Agricultural Society's programme, but is got up by private citizens, though it is to take place at the fair.
